PROFILE SUMMARY

A passionate and dedicated Full-Stack Developer with a Bachelor's degree in Computer Science and hands-on experience across multiple projects in both frontend and backend technologies. Skilled in utilizing modern frameworks and libraries, including React, Next.js, Express.js, Flutter, and React Native, to deliver optimized, responsive applications. Known for strong analytical and problem-solving skills, with proven expertise in full-stack web development and mobile development. Experienced in team collaboration, critical thinking, and effective communication. Committed to high-quality coding practices and continuous learning. Proficient in a wide array of programming languages, frameworks, and tools, with a proactive approach to tackling challenges and meeting project deadlines.

EDUCATION

University of Central Punjab, Lahore **October 2020 – July 2024**
- Bachelor of Science in Computer Science **CGPA:** 3.42

Punjab College, Lahore **September 2018 – June 2020**
- Intermediate in Computer Science (Physics) **Grade:** A

The Punjab School, Lahore **March 2016 – May 2018**
- Matriculation (Science) **Grade:** A

WORK EXPERIENCE

Dexterz Sol. **September 2024 – February 2025**
Associate Software Engineer
- Built and optimized backend systems using Node.js and Express.js, integrated with frontend frameworks like React.js and Next.js to deliver end-to-end solutions.
- Collaborated with cross-functional teams to design and implement new features, improving user experience and system efficiency.
- Developed and maintained APIs, facilitating seamless communication between client and server-side applications.
- Enhanced codebase performance, security, and maintainability by implementing optimizations.

PepsiCo Pakistan **July 2024 – August 2024**
Supply Chain Intern (Hybrid)
- Contributed to the "Spares Mapping & Criticality Analysis" project, classifying spares based on HFM, ABC, & XYZ analysis to optimize inventory.
- Collaborated with the team to develop a three-year inventory projection model, supporting supply chain decision-making processes

Programmers Force **April 2024 – May 2024**
Trainee Front-End Developer
- Completed hands-on training in HTML, CSS, and JavaScript, building a foundation in web development and responsive design.
- Explored modern frontend frameworks, including React, Angular, and Vue, enhancing versatility and understanding of UI/UX principles.
- Created cross-browser compatible websites, ensuring adherence to best practices in performance and accessibility.
- Contributed to team projects, developing interpersonal and communication skills essential for effective collaboration

PROJECTS

CarCare Pro

Final Year Project (FYP), Bachelor of Science in Computer Science

A mobile application aimed at revolutionizing vehicle maintenance for car owners. CarCare Pro manages service history, workshop recommendations, and facilitates secure history sharing during sales. Developed for Android using Flutter, the app integrates Google Maps to recommend nearby workshops based on user location. Leveraging machine learning, it predicts maintenance needs based on vehicle make, model, and mileage. Key packages used include Flutter SDK, Google Maps, Firebase, and Cloud Firestore for data management. Implemented a user-friendly dashboard for tracking vehicle maintenance history and reminders, enhancing user engagement and retention.

TrendTale

A web and mobile application that scrapes trending topics from Google Trends, allowing users to select a topic for content generation for YouTube. The application uses OpenAI's GPT-4 API to create titles, descriptions, content, video, and thumbnails. Users can edit generated content, and upon submission, they receive an email notification once the video is uploaded on YouTube. The web app is built with FastAPI, BeautifulSoup for web scraping, and React for the frontend, with packages such as Axios, Framer Motion, and Tailwind CSS for UI and functionality. The mobile application is developed using React Native. Integrated a comprehensive user authentication system and provided advanced search filters for better topic discovery.

Ease-GPT Chrome Extension

A Chrome extension that enhances ChatGPT's functionality with smart search, tabbed chats, custom variables, and an in-app purchase model for premium features. Integrated with Google Analytics for user tracking and quality assurance, it enables advanced search, saves user context across sessions, and includes dedicated features like custom vars and context persistence. The extension was developed to be featured on the Chrome Store. Built with a focus on performance optimization and included robust error handling to ensure seamless user experience.

Sweepstakes Betting Website

College Basketball Prediction Platform

A prediction market modeled after Polymarket and Tradex for American college basketball teams, providing users with betting options in a sweepstakes format. Features include points-based betting, Stripe integration for bank payments, and Coinbase integration for crypto payments. Built with Django for backend, SQL for data handling, and React for frontend interface. Key packages include Tanstack React Query, Chart.js, Firebase for Google authentication, and Tailwind CSS. Designed a responsive UI and integrated real-time updates for ongoing bets using WebSockets to ensure an engaging user experience.

Black Pearl Website Redesign

A project to transition a MEP contracting firm's website from WordPress to React, enhancing performance,animations, and localization in English and Arabic using i18next. Built with React and Tailwind CSS, the project incorporated modern UI practices to improve the user experience. Key packages include i18next,Framer Motion, Tailwind CSS, and React Icons for enhanced interactivity.

Scottish Ashna Ashri Foundation

Developed an admin panel and backend using React and Express.js, with MongoDB for the database and GridFS for storing media files such as PDFs (for an e-library), images, and audio (for E-Quran and other Islamic texts in Arabic). Built an Islamic calendar feature to add events based on the Islamic calendar. Integrated Stripe, Google Pay, and Apple Pay for donations and implemented account creation for admin and users. Authentication was handled using sessions. Prayer times were calculated based on the user's location using prayer time calculation code from PrayerTimes.org.

AutoHub360
A Next.js web application with two main functionalities:

Car Accessories Search: Scrapes data from major car-related websites in Pakistan and caches it in the database for a limited time to reduce scraping frequency. Implemented Cheerio and Puppeteer for efficient web scraping.

Car Auctions: Supports time-limited and meeting-based auctions where users need an account to post a bid or auction. Users can add detailed car information, upload multiple images, and include descriptions using React Quill. Admins can rate cars before listing them for auction.

Integrated Socket.io for real-time auction updates and notifications.

Deployed on Digital Ocean Droplet with Ubuntu and Nginx, managing domain name setup and SSL certificate configuration for secure transaction

Little Lemon
Capstone Project, Meta's Front-End Developer Certificate
A web application for table bookings for a hypothetical restaurant, Little Lemon. Developed with React, Chakra UI, and Formik for client-side validation, the project showcases skills in front-end development, UX/UI design, and responsive layout. The design process included creating user-focused wireframes and prototypes in Figma.

Sirius.Net.Co Mailer
An email campaign manager for Sirius.Net.Co that streamlines bulk email sending. Built using Next.js, Next-Auth, Prisma with PostgreSQL, React Quill for email body editing, Nodemailer, and React Email for email templates. Implements two-factor authentication for enhanced security and requires admin approval for account creation via email confirmation. The system reads email recipient lists from Excel files, allowing efficient campaign management.

Portfolio
My personal portfolio application, built with Next.js and styled using Tailwind CSS, features App Router and server components. The app includes server actions to handle form submissions and data mutations, with form validations managed by Zod and React Hook Form. Emails are styled with React Email components and sent via Resend when a user submits a response through the contact form. The portfolio also incorporates animations from Framer Motion and supports dark and light themes.

LEADERSHIP ACTIVITIES

Member, ACM, University of Central Punjab **October 2020 – July 2024**

- Organized events and workshops for ACM members, fostering skill development and professional networking.
- Mentored junior members, providing guidance and support to help them navigate academic path.
- Participated in hackathons and coding competitions representing the university, enhancing problem-solving skills and teamwork.
- Collaborated with local industry professionals to host guest lectures and seminars, bridging the gap between academia and the tech industry.
- Engaged in community outreach programs to promote computer science education among high school students.

HONORS & AWARDS

- Awarded 50% CGPA-based scholarship by University of Central Punjab from October 2020 to July 2024.
- Won first place in an inter-section English writing competition in 8th grade at The Punjab School.
- Achieved victory in an inter-campus table tennis competition with my team at The Punjab School.

PROFESSIONAL CERTIFICATES

Meta Front-End Developer Specialization, Coursera	**Certificate ID:** XEPX26FAB3MY	See Credential
• Introduction to Front-End Development	**Certificate ID:** DS27VAA3W9V7	See Credential
• Programming with JavaScript	**Certificate ID:** M9DTSTK2R9QA	See Credential
• Version Control	**Certificate ID:** X6P6JK6MXDKY	See Credential
• HTML and CSS in Depth	**Certificate ID:** V5UTSFX9U5BD	See Credential
• React Basics	**Certificate ID:** DQV8ES376ETH	See Credential
• Advanced React	**Certificate ID:** RS5293XWRLLA	See Credential
• Principles of UX/UI Design	**Certificate ID:** JJCXWY3V32PZ	See Credential
• Front-End Developer Capstone	**Certificate ID:** ESNXMJA8MD3G	See Credential
• Coding Interview Preparation	**Certificate ID:** TFCGXRFMQDWY	See Credential
Getting started with Flutter Development, Coursera	**Certificate ID:** ZT85BV9DVJ8M	See Credential

SKILLS AND INTERESTS

- **Technical Skills:** Full-Stack Web Development, Mobile Development, Data Analysis, Data Science, Database Management
- **Interpersonal Skills:** Teamwork, Communication, Critical Thinking, Analytical Thinking
- **Management Skills:** Time Management, Dedication, Discipline, Problem Solving
- **Programing Languages:** Python, C++, C, JavaScript, TypeScript, SQL, PostgreSQL, HTML, CSS, JSX, Dart
- **Frameworks/Libraries:** Node.js, Express.js, React.js, React Native, Next.js, Redux, Bootstrap, Tailwind CSS, Shadcn, jQuery, Firebase, Flutter, Pandas, NumPy, Matplotlib, Socket.io, Cheerio, Puppeteer , FastAPI, BeautifulSoup, React Quill, Chart.js, i18next, Zod, React Hook Form, Formik, Next Auth, Better Auth, Passport, Prisma, Drizzle, Framer Motion, Three.js, React Three Fiber, React Three Drei
- **Tools:** MongoDB, MySQL, Git, GitHub, Visual Studio, VS Code, Figma, Word, PowerPoint, Excel, Digital Ocean, Ubuntu, Nginx
- **Languages:** English, Urdu (Native), Punjabi (Native)
- **Interests:** Hiking, Arts and Crafts, Gardening, Animation
